NUCA Statement On WRDA Introduction

Utility Contractors Association Applauds House Action

(Fairfax, Virginia) – The National Utility Contractors Association (NUCA) issued the following statement by NUCA Chief Advocacy Officer Zack Perconti on the introduction of the “Water Resources Development Act of 2026” in the U.S. House of Representatives:

“This important bipartisan bill will deliver water infrastructure resources to many projects around the nation. It is critical for both House and Senate lawmakers to remember that thousands of American communities depend on federal resources that NUCA members use to build modern subsurface infrastructure systems that deliver clean water and sewer services to tens of millions of Americans. NUCA strongly supports this legislation and urges its passage this session.”

“Without federal investment in WRDA and many other infrastructure programs, this nation’s economy would come to an abrupt and unnecessary halt. For example, our industry members in South Florida build and complete these and other U.S. Army Corps of Engineers projects for the betterment of the state’s economy. The introduction of WRDA 2026 should be seen as an important first step towards demonstrating Congressional support for American water infrastructure projects.”
