NUCA Introduces NUCA360 Benefit for Members

NUCA360 Is a Complete Approach to Insurance and Risk Management

(Fairfax, Virginia) – The National Utility Contractors Association (NUCA) is proud to introduce this month NUCA360, an insurance and risk management program created exclusively for NUCA members and powered by Knight Insurance Group.

For the first time, NUCA members nationwide will have exclusive access to a multi-faceted program, purpose-built to reduce risk cost, fuel performance improvement, and provide more insurance options and greater choice from multiple carriers. That means more competition, stronger support resources, and higher service standards — no matter what type of company our member may operate.

Built around the unique needs of the utility construction industry, NUCA360 brings together insurance solutions and coverage options from multiple carriers, giving NUCA members greater choice, meaningful competition, and access to specialized resources and support.

From utility and excavation contractors to boring and tunneling firms, engineering companies, equipment dealers and manufacturers, suppliers, and businesses across the NUCA community, NUCA360 is designed to address the distinct risks our industry businesses face every day.

NUCA360 is built on four cornerstones that support a utility construction business throughout the entire risk lifecycle:

- **PROTECT:** Contracts, Risk Transfer, Compliance
- **PREVENT:** Safety, Training, Loss Prevention
- **TRANSFER:** Insurance Strategy, Risk Financing, Market Positioning
- **RECOVER:** Claims Advocacy, Claims Support, Performance Analytics

With NUCA360, NUCA members gain more than insurance. They gain a dedicated partner focused on understanding their business, anticipating risk, and delivering solutions that support long-term success.

The goal is simple: lower your total cost of risk, improve performance, help you grow, and give you real peace of mind. The people who build and maintain America's critical utility infrastructure deserve an insurance program built around their industry. That's NUCA360.
